MORSELIFE STAFF PROVIDING SERVICES

Clinical and Allied Health Professions (Medical) Services

In-house medical professionals include physicians, skilled nursing, occupational and physical therapists, and certified nurse assistants and health aides to provide care and treatment to both residential and non-residential clients.

Social Services

Residents are assigned a social worker on admission to answer questions and provide support to both resident and family throughout their stay. Social workers are also available to non-residential clients (i.e., Schaffer Adult Day Center).

Social workers can answer questions about Medicare and Medicaid eligibility, and assist with financial planning, referral to community services, admission/discharge planning and individual or group counseling.

Therapeutic Recreation

The therapeutic recreation department provides and plans life-affirming program and activities which are intellectually and socially stimulating for groups and individual residents.

Religious Activities

The Religious Activities Department serves the spiritual, cultural and emotional needs of all residents. In addition to our traditional, weekly Shabbat services in our chapel, Morse Geriatric Center plans observances for all Jewish holidays and festivals. All residents, family members and friends are welcome to participate in Shabbat and holiday services. The Director of Chaplain Services is available for spiritual and religious counseling.

Culinary and Nutritional Services

Morse Geriatric Center maintains a kosher food service department with oversight by a professional Mashgiach. The meals and snacks that are served here to resident and non-resident clients follow guidelines that have been established by the State of Florida and Federal government.

Housekeeping and Laundry

The housekeeping Staff works daily to keep all resident rooms and common areas clean and sanitary. We offer personal laundry services with assurance of proper and prompt handling.

Facilities Management and Security

Facilities management Staff maintains buildings and grounds, equipment, and residential units. Staff assists residents on an on-going basis with monthly handy-man services as well.

MorseLife's security service deploys a professional team to maintain the best possible environment for both clients and Staff. The security team monitors activities on campus and assists where necessary to provide clients and Staff a safe environment without an intrusive presence.

Transportation

Residential (independent and assisted living) clients have access to professional drivers providing transportation services for groups and individuals to a wide variety of destinations locally and throughout Florida and beyond. A personal driver is also available to residents twice monthly for more localized destinations.
